

Journey to enable EUDR compliance

Leading systemic change and developing enhanced technologies to help companies meet EU Regulation on Deforestation-free Products (EUDR) requirements

FSC® F000100

JUNE 2023:

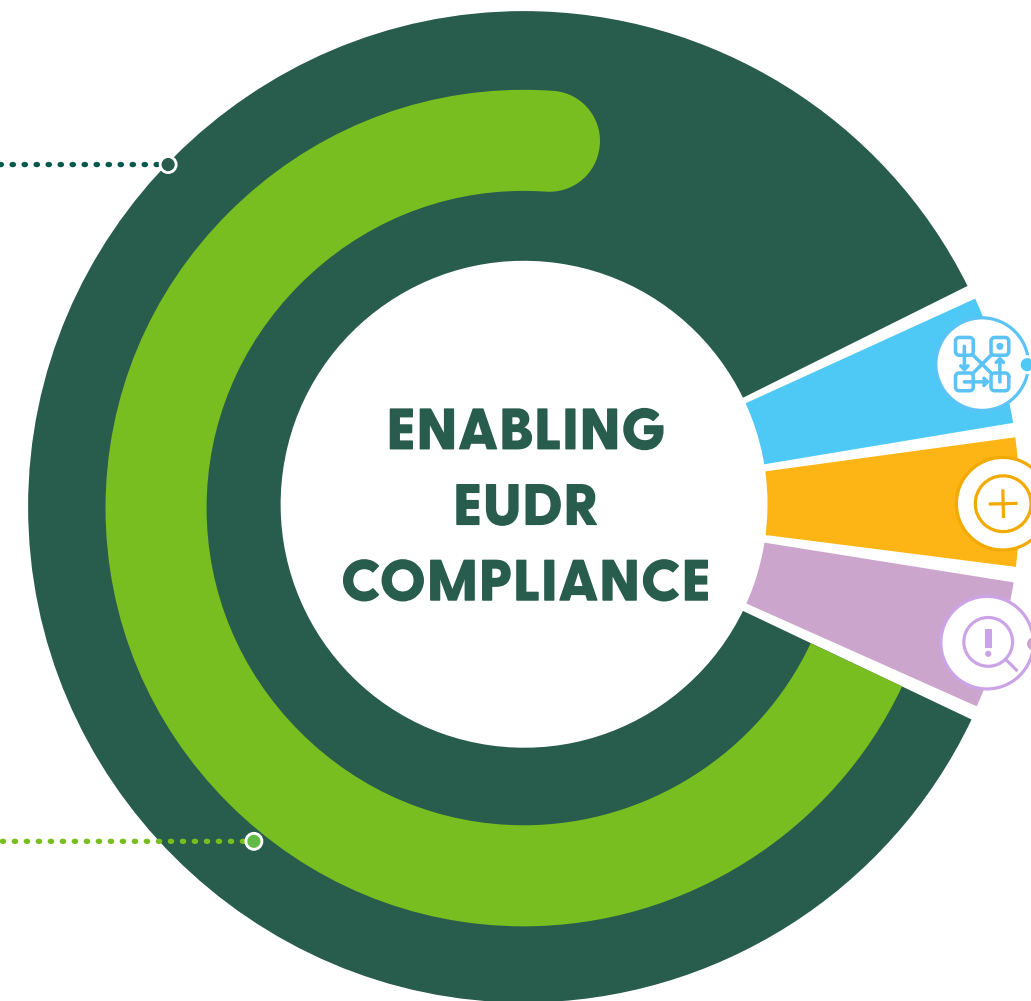

The EU brings the Deforestation-free Products Regulation into force as the EUDR

FSC certification delivers on numerous EUDR requirements.

FSC FOREST MANAGEMENT CERTIFICATION and products with the **FSC 100%** label meet the **vast majority of EUDR requirements.**

FSC CHAIN OF CUSTODY CERTIFICATION and products with the **FSC MIX** label meet **numerous EUDR requirements.**

Products with the **FSC RECYCLED** label are **exempt** as they do not include any virgin forest material.

JUNE 2024:

FSC EUDR Aligned will enable companies throughout forest supply chains to meet their EUDR obligations

FSC BLOCKCHAIN* will enable companies to track the material's journey through the entire supply chain, meeting EUDR traceability requirements and providing the ability to generate due diligence statements for submission to the EU.

FSC REGULATORY MODULE** will provide additional requirements enabling companies to meet **EUDR deforestation, degradation, and legality requirements.**

FSC RISK MANAGEMENT FRAMEWORK*** will enable companies to develop risk assessments aligned with EUDR. In 2025, **FSC's NEXT GENERATION RISK ASSESSMENTS** will become available, significantly relieving risk management efforts for companies.
